

10 Questions to ask Your Potential Metal Forming Controller Partner

There are a lot of choices when it comes to selecting a partner for your metal forming controller. That's we've come up with a list of 10 questions to help you through this process. Regardless of who you decide to use as your controller partner, be sure you are comfortable with their ability to support your current and future needs.

1. How long have you been developing controllers for the metal forming industry?
2. Approximately how many machines currently use your solutions?
3. What is your involvement in the metal forming industry?
4. Who are your industry experts?
5. Do you offer ongoing training for your solutions?
6. What are your support and warranty options?
7. What reporting does your solution offer to help me improve efficiency and track downtime?
8. Do you have a solution to help me track and validate coil usage?
9. Does your controller integrate with other systems such as our ERP or shipping software?
10. What are some future developments you can share?
