

XL200 Series Controls for Roll Forming Machines

# GIVE YOUR MACHINES...

Are the controls for your roll forming machine outdated?

How much money have you lost to scrap and inefficiencies in production?

## ...THE BEST CONTROLS

AMS Controls has the solution. Our XL200 Series of controllers work with all major manufacturer's machines. Update your controls to give your roll former a longer life, increased performance and a few new tricks.

## NEW LIFE, NEW PERFORMANCE, NEW TRICKS

XL200 Series Controls for Roll Forming Machines

### 

#### Reliable controls extend machine life

The XL200 control system package restores your roll forming machine with a new electrical control system and added functionality. You'll see improved performance and increased accuracy when you add our new controls to your old machine.

## NEW PERFORMANCE

## Improve accuracy and reduce downtime

The XL200 series of roll forming controls are more accurate than PLC-based control systems and will increase the speed of your production while decreasing your scrap and downtime. It's a great way to improve your overall performance without the expense of buying a new machine.

### 

#### Integrate with your office with Eclipse Production Management Software

When you combine the power of the XL200 with Eclipse Production Management Software, you can download orders straight from the office to your machine.

Integrate your office and save time, eliminate errors, improve productivity and receive valuable data.

Use Eclipse's detailed reporting to track:

- Scrap Rate
- Coil Inventory
- Machine Downtime
- Good Footage
- And More

All AMS Controls products are designed and manufactured in the U.S.
